Summary

- A motivated and enthusiastic Computer Science and Design Engineering student with a solid foundation in front-end development and UX design. I am eager to apply my skills in web development and design to create user-friendly and engaging digital experiences. Seeking an opportunity to showcase my front-end and UX skills in a dynamic environment where I can contribute and grow.

Projects

E-Learning Platform (HTML, CSS, JavaScript)

- Developed a responsive e-learning platform to deliver engaging educational content. Features include an interactive course catalog, a dynamic progress tracker, and user-friendly navigation. Emphasized clean layouts and seamless interactivity to ensure an intuitive learning experience for users.

Keeper App (React.js)

- Built a simplified version of Google Keep to manage notes efficiently. Leveraged React.js for a component-based architecture, allowing users to add, edit, and delete notes dynamically. Focused on UX design by implementing a clean, responsive layout with vibrant colors and an intuitive interface for a seamless user experience.
